

OneStream Planning: The Why, How and When

Errata

Chapter 2 | Core Planning I – Data and Calculations | page 50; section RemoveNoData and RemoveZeros. Amended in print and PDF additions from February 2nd 2022.

should be:

The RemoveNoData and **RemoveZeros** formula functions are simple additions to data buffer definitions that remove NoData and Derived data from data buffers. Use them.

Chapter 2 | Core Planning I – Data and Calculations | page 64; screenshot of code. Amended in print and PDF additions from February 2nd 2022.

should be:

Clearing the Distribution buffer... the comment before the data is cleared should read **Clear Distribution** (not Clear Sales).

Chapter 5 | All Data Points Lead to Reporting and Analysis | 19 June 2023

The URL used in the Data Connector Rule *AVBS_FarmersMarket_Data* is no longer valid, as the USDA has changed the structure.

Users now need to request for an API key and use the code below.

```
Dim strAPIKEY As String = <substitutue your apikey>
```

```
Dim strSearchURL As String =
```

```
$"https://www.usdalocalfoodportal.com/api/farmersmarket/?apikey={strAPIKEY}"
```

```
For Each zipCode In zipCodeList
```

```
Dim marketRequestClient As New HttpClient()
```

```
Dim marketInfoResult As HttpResponseMessage = marketRequestClient.GetAsync(strSearchURL  
& "&zip=" & zipCode).Result
```
